This project has been funded with support from the European Commission. This publication (communication) reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

## THE BACKGROUND

Currently, when the economic downturn is more than known, for all Europeans alternative ways to approach to its solution are necessary and moreover, urgent. These alternatives have been underscored by the EC in several moments, pointing out that the entrepreneurial spirit and the real possibilities of establishing a business need to be boosted in Europe.

Investing in entrepreneurship education is one of the highest return investments Europe can make.

## THE AIM

B-Entrepreneur general aim is to support the access to the most innovative and validated best practices in training and education in the field of entrepreneurship developed in the framework of the LLP, especially focused on the target groups and valorisation best practices. The project aim is to contribute to reach the EU2020 and the Entrepreneurship Action Plan regarding the need of education in this field to promote a more competitive EU.

This is achieved through a sound methodology with important milestones such a research and an articulated assessment of training tools in the field of entrepreneurship, which also explored the methods and achievements in influencing decision makers.

## THE PROJECT

Numerous individual LLP projects have been developed during the 2007-2013 programming period in the field of entrepreneurship.

B-Entrepreneur identifies and evaluates 300 LLP best practices in education carried out in 27 member states.

The best practices belong to the following categories:

- Entrepreneurship in disadvantaged groups
- Training methodologies
- Accompanying measures

## THE INTERACTIVE ONLINE LIBRARY

The Interactive Online Library is the tool produced by B-Entrepreneur. Available on the website of the project, it shows the best 81 projects evaluated by the experts.

Of these projects, the 26 best ranked were chosen and then subjected to more thorough evaluation, producing a ranking now available on the B-Entrepreneur website.

The descriptions of these 26 projects have also been translated into partners' languages, so as to facilitate a first reading aimed at an eventual adoption of the best practice in a different country. The database will be available and kept for at least 3 years once the project is completed.

You can find us on:
